

SPECIFICATION SHEET

RAND Picnic

RAND Picnic is a user-friendly and simplistic motor boat, driven by electricity for respectful joy at sea.

HULL

- Hand-laid fibre glass built around careful selection of sustainable kernel materials
- Stringer system hull for greater strength
- Foam kernel with strong buoyancy making boat unsinkable
- Hull reinforced with hand-laid rowing at both keel and bow, and assembled with deck through strong glue and pop rivets
- Hull treated with topcoat around inside providing a finer, more easily cleanable finish
- Self-bailing drains in each side of the transom which gives a nicer finish and makes it easy to clean
- Brass drain plug in the bottom of the transom
- Solid stainless steel towing eye mounted at bow
- RAND Logo mounted in both sides
- Available in dark blue and steel grey as standard colours, but can be customized at additional costs

DECK

- Deck built in sandwich construction of glass fibre and sustainable core materials
- Deck available in dark blue and steel grey as standard colours, but can be customized at additional costs
- 40x40mm fender profile mounted on the sheer line
- Electric charging socket in stainless steel mounted above bathing platform
- Three stainless steel mooring bollards mounted at bow and stern
- Stainless steel engine mount with Kebony wood insert

COCKPIT, PICNIC TABLE & STORAGE COMPARTMENT

- Seating space for up to 10 people
- Sustainable Kebony wood dining table mounted into aluminium floor sockets
- Spacious u-shaped seating in bow area
- Stainless steel self-bailing drains in each side of cockpit floor
- Anti-slip floor for steady and safe traction
- Easily accessible 700 litre storage compartment with stainless steel padlock hasp
- Extra-large storage compartment hatch built into bench

BATTERY AND ENGINES AS EXTRA EQUIPMENT

- Battery options from 2.700 – 11.200 wh
- Electric outboard engine options up to 10hp
- Gasoline outboard engine options up to 25hp

BATHING PLATFORM

- Anti-slip surface for steady traction
- Fender profile on edges with stainless steel end

GENERAL

The specification is subject to change without notice, and valid when printed. Details in construction, design and equipment can be changed as a result of the experience from use. The quality and equipment standard, however, are equivalent at least to this specification. Photographs may contain items that are extra equipment.
